

React Native Setup Guide

1. Install:

- Node.js, Watchman, JDK, Android Studio/Xcode

2. Create Project:

`npx react-native init MyApp`

3. Run App:

- Android: `npx react-native run-android`
- iOS: `npx react-native run-ios` (macOS only)

4. Debug:

- Use React Native Debugger or Chrome

- Enable Fast Refresh, inspect with Dev Menu

Useful folders:

- /android, /ios, /src
